Form FSA-Gen 196 (Superseding Forms FSA-FC 2-7 and FSA-FC 38)

Explanation

This Register is a revision and combination of the former project registers, Forms FSA-FC 2-7 and FSA-FC 38. The information contained therein is as of the date shown on each page.

The land acquisition and land development projects are not included in the Register because administrative jurisdiction of the Land Utilization Program was transferred to the Bureau of Agricultural Economics by the Secretary's Memorandum No. 733 September 1, 1937. Projects transferred to Government agencies other than the Bureau of Agricultural Economics also are not included.

The active and inactive projects in each state are in numerical order (the missing numbers being explained by the above transfers and by cancellations, combinations, etc.). First are listed projects which are (1) exclusive investments of the Federal Government or (2) joint investments of the Federal Government and a State Rural Rehabilitation Corporation. These projects carry such symbols as RR, RI, RF, SH, RH, SR, and FS. Unless otherwise indicated in the status column, the RR, RI, and SR projects were initiated by the Resettlement Administration, the RF projects by the State Corporations, the SH and RH projects by the Subsistence Homesteads Division of the Department of the Interior. The FS projects were initiated and developed by the Forest Service with the cooperation of the Resettlement Administration and the FSA, and with Funds of the latter two agencies.

For most states there is a second list of projects carrying the "S" symbol, which designates "State Corporation," and three-digit numbers beginning with 101 (unless that particular number has been discontinued or cancelled in a given state.) These projects are exclusive investments of the State Corporation. In the previous State Corporation Project Register, Form FSA-FC 38, joint investment projects were also included in the "101" series, but such projects now have only one number. However, for purposes of identification, the obsolete "101" series number of each joint investment project is shown in parenthesis in the column headed "FSA Project No." Several projects which are exclusive Corporation investments also formerly carried two numbers, but now only the "101" series number is retained for them. However, the obsolete numbers of these projects are nevertheless shown in parenthesis under their correct numbers for purposes of identification.

In order to distinguish active from inactive projects, the titles of active projects are given in capital letters.

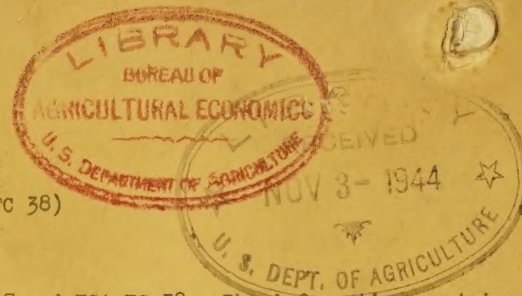

Special attention is called to the headquarters column. The term "Headquarters" properly applies only to active projects. A "headquarters" given for an inactive project is merely a nearby city.

Additional Copies of Form FSA-Gen 196

Form FSA-Gen 196 is issued by the Budget Office. Requests for copies should be addressed to Mr. C. B. Baldwin, Assistant Administrator, Attention: Budget Office, or telephoned Branch 413, Farm Security Exchange.

Revisions and/or Supplements

The present issue of Form FSA-Gen 196 is based on the latest and most reliable data available in Washington. Revisions and supplements, containing revised, corrected, or additional data, will be issued from time to time.

THE HISTORY OF THE
CITY OF BOSTON

FROM 1630 TO 1800

The history of the city of Boston is a history of the growth of a great city from a small fishing village. The city was founded in 1630 by a group of Puritan settlers who came to the New World in search of a better life. The city grew rapidly and became one of the most important cities in the colonies.

The city was the center of the American Revolution and played a key role in the struggle for independence. The city was the site of the Boston Tea Party and the Battle of Boston. The city was the birthplace of the American Republic.

Form FSA-Gen 196, Official Project Register

In order to facilitate various filing, accounting, and reporting functions, all State Corporation projects, formerly numbered in the series beginning with 101, have been renumbered in a series beginning with 51. The new numbers were determined by subtracting 50 from the former numerical designation of each project.

The primary purpose of this revision of the Project Register is to show the new numbers. However, a few of the attached sheets are issued to show registration of new projects; corrections, additions, and deletions of previously issued project data. All of the attached sheets should be inserted in the buff binder. The old sheets, which are being replaced, should be removed and destroyed.

Following are minor changes in project data which should be written in or typed in on the old sheets;
